

COMPUTER RISK MANAGEMENT, INC.

Ty Smith Joins Computer Risk Management

Oklahoma City, OK, December 3, 2007 – Computer Risk Management (CRM) a provider of claims and risk management software today announced that Ty Smith has joined the firm as Vice President, Marketing and Sales. Mr. Smith will be responsible for the development of CRM's business across all industry sectors.

“Ty Smith has extensive knowledge of the trucking insurance and risk management marketplace, said John Sullivan, Chairman of Computer Risk Management. “I am delighted to be able to renew our working relationship and have every confidence that he will assist us in building on the success of our proven claims management software”.

Mr. Smith has over 30 years of progressive business experience in the Manufacturing, Transportation and Insurance industries. He was formerly Director of Human Resources & Labor Relations for a large Oil & Gas manufacturing company; Vice President Risk Management of a large complex trucking company; Vice President of Sales for a retail insurance agency that specialized in transportation; President & COO for a multi-State Managing General Agency that focused on providing insurance transportation products for over 200 independent agencies.

About Computer Risk Management (CRM)

CRM is a software provider to the claims and risk management industries. Its products are used by organizations to internally manage claims and control the costs of self-insured risks. The company primarily serves the needs of the transportation industry and public sector.
